

## **CITY COUNCIL WORKSHOP**

### **Water/Sewer Rate Study**

**Tuesday, May 24, 2011**

Mayor Cassinelli called the workshop to order at 4:00 p.m. at the Fire Station. Council members Forner, Berger, Smith, Jensen, and Marshall were present. Elaine McMillan and Gail Moore were present. Cathi Read participated via phone. The mayor and Cathi began by leading the group through the task list and identifying the progress that had been made as well as open items. The group then discussed the surveys collected and the 4 to 5 surveys that need follow up. The council then reviewed the three rate structures that Skip had put in the calculator. It was noted that there was no allowance yet for larger customers that may not be putting all of the water consumed into the sewer system. The method of how customers would convey mitigated water was briefly discussed. Two of the calculators prepared by Skip incorporated a peaking factor. It was questioned as to whether the peaking factor was applied to both the base charge and the commodity rate. It was determined that follow up on the surveys was needed to incorporate allowances into the calculator. Jensen adjourned the workshop at 6:00 p.m.
